

Occupational Health, Safety & Environmental Services Ensuring a healthy and safe workplace for your organisation

Ensuring a healthy and safe workplace by adhering to Occupational Health, Environmental and Safety (OHS&E) standards is good business practice. In the current legislative context, not adhering to standards is putting your business at risk.

The legislation makes it very clear that it is every employers obligation to provide a safe workplace: An employer must ensure the health, safety and welfare at work of all employees of the employer (OH&S Act 2000). Active Working Solutions is as an experienced OHS&E consultancy business which offers solutions to help you ensure that your OHS&E practices comply with your OHS&E obligations.

What can we do to help reduce your premium?

OHS&E AUDIT

This entails a comprehensive review of all aspects of your business including reviews of policies and procedures, consultation and communication in safety, plan, records, management systems and training regimes, hazard identification, risk management systems.

ERGONOMIC & WORKSTATION ASSESSMENTS

Assessing and educating employees on best-practice workstation ergonomics can help to ensure compliance with workplace health and safety. AWS Ergonomic Assessments aim to ensure your employee workstations are conducive to their health and safety at work and our education services aim to educate your employees on correct work practices.

PRE-EMPLOYMENT SCREENINGS

AWS Pre-Employment Screenings assess a persons capability to perform the critical demands of the job for which they are to be hired prior to employment (conducted with or without drug and alcohol testing).

SAFE WORKING METHODS STATEMENTS (SWMS)

AWS can assist you in the development of safe approaches to work by developing your SWMS, bringing together our OHSE knowledge, experience and your knowledge of your current workplace tasks to create procedures that aid in the prevention of injuries.

RISK ASSESSMENT OF SPECIFIC WORK PROCESSES

To meet OHSE obligations you must assess the risk associated with your business activity. We can assist in this essential business process by performing risk assessments. Your business gains the advantage of trained, objective assessors. AWS reports include a job analysis, recommendations for improvements and accompanying photographs.

HAZARD INSPECTIONS

Constant vigilance in looking for hazards, is another core feature of any OHSE system, and is an expectation under the legislation. Outsourcing to AWS you engage an experienced and trained professional and remain objective to the risks associated with your workplace. The report includes risk ratings, suggestions to eliminate or manage the hazards and accompanying photographs.

There are predominantly two reasons why organisations need to ensure safe and healthy workplaces - to save money on workers compensation claims as a result of workplace injuries and to reduce the presence of anxiety and stress (i.e. human suffering) with workers.

WorkCover News 2002

A safe and healthy workplace helps to minimise the risk of workplace injury. But to reduce these costs, organisations need to reduce the prevalence of workplace injuries and the severity of such injuries.
